m3

5. (Amended) A method for processing data requests from clients of particular practitioners on a distributed computer network, the method comprising the steps of:

(a) maintaining a main document database;

(b) registering the practitioners;

(c) processing document selections of the practitioners from the main document database to identify respective home document sets of the practitioners;

(d) identifying requesting users as clients of corresponding practitioners;

(e) processing client requests for permitting access by particular clients to the home document sets of corresponding practitioners; and

(f) transmitting requested pages of the home document sets to the particular clients.

m3a

6. (Amended) The method of claim 5, further comprising maintaining a practitioner database, and including practitioner-specific portions of the practitioner database in pages of the home document sets being transmitted to the particular clients.

m3b

7. (Amended) The method of claim 5, further comprising maintaining a client database, and including client-specific portions of the client database in pages of the home document sets being transmitted to the particular clients.

m3b1

8. (Amended) The method of claim 7, further comprising maintaining client data and/or statistics of the particular clients in the client database.

m3b1a

9. (Amended) The method of claim 8, further comprising tracking client access to the home document sets.
